

Go green with Kenlawn this season

It is time to start using a naturally organic approach to lawncare!

Compost Top Dressing:

- Top dressing is the direct application of a layer of compost on your lawn using a motorized applicator with precise application.
- Compost improves the structure of every type of soil.
- Compost is the only slow-release soil amendment containing all the necessary nutrients to maintain a balanced lawn.
- Some benefits include:
 - More porous
 - Better drainage
 - Promotes root structure
 - Balances PH levels
 - Rich soil
 - Denser and greener grass
- One application can fulfill between 50% - 100% of your annual fertilizing needs.
- This process is drawn from the much larger units used on sport fields and golf courses across the country.
- 1/8" - 1/4" of an uniformed layer applied.
- Pricing is based at \$95.00 per cubic yard of material applied. (Typically 2 - 6 cubic yards required).

Lawn Renovation:

• If your full or partial lawn is in need of a more extensive treatment, lawn renovation might be for you. This 5 step process consists of:

- 1) Grass cutting
- 2) Double pass aerating
- 3) 1/4" compost top dressing
- 4) Sun / shade seed mixture application
- 5) Starter fertilizer

All lawns can benefit from this process in order to help thicken turf and eliminate thin and/or bare spots. Pricing as follows:

- 1,000 (min) - 2,500 sq. ft. = \$180.00 per 1,000 sq. ft.
- 2,501 - 5,000 sq. ft. = \$165.00 per 1,000 sq. ft.
- Over 5,000 sq. ft. = \$150.00 per 1,000 sq. ft.

Estimate will be provided.
